Abstract

I find the topic of chat bots and virtual assistants really cool. I will try to gather here some information found on the web.

1 Journal

30.04.18 ∼ Chat bots: Tai, Xiaoice, Named entity recognition, A nice blog about NLP
It seems that some fairly advanced chatbots already exist:
Wiki: Xiaoice
Wiki: Tay

01.05.18 ∼ Google assistant, Dialogflow (API.AI), some french companies making chatbots
I discovered the company **Dialogflow** owned by google:
Wiki: Dialogflow
and also read about **Google assitant**:
Wiki: Goolge Assitant
I also discovered the following french companies/start-ups specialized in chatbots:

- Zelros: `http://www.zelros.com/`

- recast ai: `https://recast.ai/`

- golembot: `http://golembot.net/`

02.05.18 ∼ A Coursera course to build your own bot
Roman recommended this course about NLP:
`https://www.coursera.org/learn/language-processing`

In the description of the course, they say that the final project consist in building your own chatbot.
